FloridaCHARTS.com Population Estimates Query

Population estimates are provided by the Florida Legislature's Office of Economic and Demographic Research (EDR). Population data shown on CHARTS and EDR's website may not agree, since EDR revises its population estimates each year for all years. CHARTS prior year population data are not revised.

Row, Column and Filter Variables

Variable	Description
County	Lists all 67 Florida counties
Year	Population estimates are available starting with 1970 and are generally five years into the future
Age**	Ages 0 to 99 will display population for all age groups. All ages over 85 are classified as 99. Age groups available: <1, 1-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79, 80-84, 85+; Individual ages are available by expanding the age groups.
Sex	Male, Female or Unknown
Race	White, Black and Other (Black, Other), Unknown
Ethnicity	Hispanic, Non-Hispanic, Unknown Population estimates for Hispanic and Non-Hispanic populations are not available prior to 2004.

**Age-group data is provided by EDR in 5-year intervals (e.g. 0-4, 5-9, 10-14 etc.). Individual year of age populations are calculated by dividing the 5-year totals by 5. Data for the <1 population are derived from birth and infant death data, instead of dividing the 0-4 population by 5. Data for the 1-4 population are derived by subtracting the <1 population based on birth and infant death data from the 0-4 population provided by EDR. The difference is then divided by 4 to produce estimates for individuals age 1, 2, 3, and 4. Where totals do not sum, it is due to rounding.
